**Subject:** Microsoft Settlement

I sincerely believe that this settlement is not in the best interest of the American people for there is a lack of means of enforcement. Microsoft had already been tried and found guilty of unlawful monopolistic actions even though there were restrictions set on their behaviour. Microsoft believes that they are above the law, that they can just buy their way and once they are found guilty after years and years of trial the settlement is one they can very easily break, just like the last one. We need a punishment that can and will be enforced.

Guillaume Théoret
